

Mp3 Mhyst - Ithnan Ruh

[DOWNLOAD HERE](#)

A celebration of world music. Each track is inspired by a different country. It is all ambient and melodic music. The instruments used on each track are authentic to that country for example the sitar and tabla on Barak, Te Deseo. 11 MP3 Songs in this album (70:15) ! Related styles: NEW AGE: Ethnic Fusion, NEW AGE: Ambient People who are interested in Mike Oldfield Deep Forest Michael Nyman should consider this download. Details: The album Ithnan Ruh is my debut solo release. I have been described as a modern "stripped back" enigma. I find this a great compliment as I started listening to enigma when I became interested in ambient and new age. The music is very relaxing and some of the tracks are ethnic in style. The album was recorded, written and produced at The Fusion Room in Huddersfield, UK. I have included a list of equipment used so that you can see that not that much is required to produce music. I have found that some budding musicians believe they need to spend a fortune to gear up for producing but the truth is you don't. I will be studying for my music technology/popular music degree starting this year at university. I hope to go on to composition as a career, or something in production or sound design. I intend to tutor as well. My favourite track is "Humn Nahr" and recommend you have a listen to it if you like enigma, enya and deep forest type music.
