Its unheard of, I know, but its really possible with this new product thats easy to use and installs in seconds - No technical skills are required! When you are cruising the internet and you run into a website you want info from, dont you hate it when a popup occurs? Even though you may have a popup blocker you still may end up getting them. What about hover ads? Some people just click the 'close' button to get rid of them. Or they may misfire and you end up with no hover ad. Even if they do stay on the screen, you have to use your mouse to connect to the ad and type in what is required. This can be awkward to say the least. I know, I have seen them as well. At first I didnt like them, but in my marketing efforts I found myself using them. I really had no choice until I discovered the answer. What I discovered changed the way I did marketing. When I applied my new discovery to my own website, I noticed my opt-in list grew tremendously. A New Way of Marketing If you think about it, your ad is supposed to gather the attention of people with the goal of selling something. You have to connect with them in any way you can, but the way to do it must prove beneficial. Your ad is meant to draw customers, not send them away or irritate them. This was happening to me initially when I used popup and hover ads. But when I used my most

recent discovery, I saw my opt-in list explode and my sales increase as much as 300 within three days! What I discovered was a new way of marketing. This new way of marketing would end up becoming the cornerstone for getting people to join my list. A Script to Produce Customizable Slide-Up Ads What I created was a script that creates customizable slide-up ads. When I checked online to see if my invention was already done, I noticed someone else had created one like it, but theirs was way too slow and not really customizable. I created one that was blazingly fast. In fact, here are the attributes of what my script can do: The script is lightning fast, competitor scripts are very slow The contents of the slide up ad can be completely customized You can easily create your own unique templates No database is needed The slide ups are unobtrusive ads at the bottom of the browser The ads will not be blocked by popup blockers Can be used for any type of website, wordpress blog, joomla portals etc. License Terms: [YES] Can be sold [YES] Salesletter can be edited [YES] Can be packaged [YES] Can be offered as a bonus to a paid product [YES] Can be added to a paid membership site (the membership has to cost at least \$17/month) [YES] Can sell Resale Rights [YES] Can sell Master Resale Rights [NO] Can be given away [NO] Can be offered as a bonus [NO] Can be added to a free membership site [NO] Can be offered through auction sites [NO] Can sell Private Label Rights
