At Last.. An Easy Way To Give Your Website Links More Impact! Sorry if Ive offended you by describing you as struggling, but I know that many webmasters (and webmistresses!) find it hard to use the latest technologies to give their websites more impact. But it is those savvy webmasters who use these technologies that find that their websites are more appealing and more interactive. These are the websites which are getting results, which are bringing in the sales - even in these difficult times. I want to bring you some help. Im going to give you some software which will let you, without any techie skills, supercharge the links on your website. The software is called.. WebLinker Pro Lite It lets you put links on your web pages which do not take your visitor away from your page - always a bad idea! Its easier to demonstrate rather than describe the effect, Or, how about the ability to show a larger version of an image - without the visitor having leave your page when the larger image opens in a new browser window. And without those rather clumsy Javascript popup windows (which are often blocked.). Grab Now!we
