

Adsorption Technology In Water Treatment

[DOWNLOAD HERE](#)

1; Preface; 11 2; 1 Introduction; 13 2.1; 1.1 Basic concepts and definitions; 13 2.1.1; 1.1.1 Adsorption as a surface process; 13 2.1.2; 1.1.2 Some general thermodynamic considerations; 14 2.1.3; 1.1.3 Adsorption versus absorption; 15 2.1.4; 1.1.4 Description of adsorption processes: The structure of the adsorption theory; 15 2.2; 1.2 Engineered adsorption processes in water treatment; 17 2.2.1; 1.2.1 Overview; 17 2.2.2; 1.2.2 Drinking water treatment; 18 2.2.3; 1.2.3 Wastewater treatment; 18 2.2.4; 1.2.4 Hybrid processes in water treatment; 19 2.3; 1.3 Natural sorption processes in water treatment; 20 3; 2 Adsorbents and adsorbent characterization; 23 3.1; 2.1 Introduction and adsorbent classification; 23 3.2; 2.2 Engineered adsorbents; 24 3.2.1; 2.2.1 Activated carbon; 24 3.2.2; 2.2.2 Polymeric adsorbents; 27 3.2.3; 2.2.3 Oxidic adsorbents; 28 3.2.4; 2.2.4 Synthetic zeolites; 29 3.3; 2.3 Natural and low-cost adsorbents; 30 3.4; 2.4 Geosorbents in environmental compartments; 31 3.5; 2.5 Adsorbent characterization; 32 3.5.1; 2.5.1 Densities; 32 3.5.2; 2.5.2 Porosities; 34 3.5.3; 2.5.3 External surface area; 35 3.5.4; 2.5.4 Internal surface area; 37 3.5.5; 2.5.5 Pore-size distribution; 40 3.5.6; 2.5.6 Surface chemistry; 46 4; 3 Adsorption equilibrium I: General aspects and single-solute adsorption; 53 4.1; 3.1 Introduction; 53 4.2; 3.2 Experimental determination of equilibrium data; 54 4.2.1; 3.2.1 Basics; 54 4.2.2; 3.2.2 Practical aspects of isotherm determination; 57 4.3; 3.3 Isotherm equations for single-solute adsorption; 59 4.3.1; 3.3.1 Classification of single-solute isotherm equations; 59 4.3.2; 3.3.2 Irreversible isotherm and one-parameter isotherm; 60 4.3.3; 3.3.3 Two-parameter isotherms; 61 4.3.4; 3.3.4 Three-parameter isotherms; 67 4.3.5; 3.3.5 Isotherm equations with more than three parameters; 70 4.4; 3.4 Prediction of isotherms; 71 4.5; 3.5 Temperature dependence of adsorption; 76 4.6; 3.6 Slurry adsorber design; 79 4.6.1; 3.6.1 General aspects; 79 4.6.2; 3.6.2 Single-stage adsorption; 81 4.6.3; 3.6.3 Two-stage adsorption; 84 4.7; 3.7 Application of isotherm data in kinetic or breakthrough curve models; 86 5; 4 Adsorption equilibrium II: Multisolute adsorption; 89 5.1; 4.1 Introduction; 89 5.2; 4.2 Experimental determination of equilibrium data; 90 5.3; 4.3 Overview of existing multisolute adsorption models; 92 5.4; 4.4 Multisolute isotherm equations; 93 5.5; 4.5 The ideal adsorbed solution theory (IAST); 96 5.5.1; 4.5.1 Basics of the IAST; 96 5.5.2; 4.5.2 Solution to the IAST for given equilibrium concentrations; 100 5.5.3; 4.5.3 Solution to the IAST for given initial

concentrations;102 5.6;4.6 The pH dependence of adsorption: A special case of competitive adsorption;106 5.7;4.7 Adsorption of natural organic matter (NOM);110 5.7.1;4.7.1 The significance of NOM in activated carbon adsorption;110 5.7.2;4.7.2 Modeling of NOM adsorption: The fictive component approach (adsorption analysis);112 5.7.3;4.7.3 Competitive adsorption of micropollutants and NOM;116 5.8;4.8 Slurry adsorber design for multisolute adsorption;123 5.8.1;4.8.1 Basics;123 5.8.2;4.8.2 NOM adsorption;124 5.8.3;4.8.3 Competitive adsorption of micropollutants and NOM;125 5.8.4;4.8.4 Nonequilibrium adsorption in slurry reactors;130 5.9;4.9 Special applications of the fictive component approach;132 6;5 Adsorption kinetics;135 6.1;5.1 Introduction;135 6.2;5.2 Mass transfer mechanisms;135 6.3;5.3 Experimental determination of kinetic curves;136 6.4;5.4 Mass transfer models;139 6.4.1;5.4.1 General considerations;139 6.4.2;5.4.2 Film diffusion;141 6.4.3;5.4.3 Surface diffusion;148 6.4.4;5.4.4 Pore diffusion;155 6.4.5;5.4.5 Combined surface and pore diffusion;161 6.4.6;5.4.6 Simplified intraparticle diffusion model (LDF model);165 6.4.7;5.4.7 Reaction kinetic models;174 6.4.8;5.4.8 Adsorption kinetics in multicomponent systems;176 6.5;5.5 Practical aspects: Slurry adsorber design;178 7;6 Adsorption dynamics in fixed-bed adsorbers;181 7.1;6.1 Introduction;181 7.2;6.2 Experimental determ EAN/ISBN : 9783110240238 Publisher(s): De Gruyter Format: ePub/PDF Author(s): Worch, Eckhard
