A fusion of its own kind, instrumental gypsy polyrhythmic maze patterns swirling into dreamscapes. 22 MP3 Songs WORLD: World Fusion, WORLD: Gypsy Details: "A collection of music inspired by an unusual decade....with a snow-boys quill, festering on the notions that his motion has no aim and that his uses have no gain..." as described by composer/multi-instrumentalist Paul Christopher Kozlowski who has a home base in Buffalo NY. A long time devotee and contributor to the avant-garde, progressive underground scene in his hometown. Paul has been in projects ranging from extreme gindcore/noise outfit "Parade of the Lifeless" to ethereal dreamscape opera band "Round Robin". Along with these, he also scores and performs {usually solo!} music for underground plays with The New Phoenix Theatre, Skeletons in the Closet and TORN SPACE. This compilation of his music features pieces from Franz Kakfas "Metamorphosis", Dan Shanahans "Muriel Vanderbuilt Goes Walking" and Franklyn Lavioe's "Medium Rare". As well as music inspired by his journeys through Eastern Europe, learning from Algerian, Naplolitalian musicians. Cutting then to anime' style head trips, sometimes just bizzare and varies track to track. A truly unique vision from start to finish. Instrumentation.
