

Mp3 Cutpharmers - Prescribed Rhymes For The Mind

[DOWNLOAD HERE](#)

High tech hip-hop recorded in a suburban master bedroom studio, but I'd put it against anyone's music... 14 MP3 Songs HIP HOP/RAP: Hip Hop, ELECTRONIC: Trip Hop Details: CUTPHARMERS consists of members Kenneth Rankin(KEANO the INVENTOR)- Bernie Saujon(GRAD-B)- Andre Simms(A-STATIC)- Markeus Walker(TITO) as for the new release titled -PRESCRIBED RHYMES for the MIND- Many of you know that CUTPHARMERS was started back in the day by Bernie and Kenneth with the first release THE PACKAGE. These two put ideas together with much needed tech support by Richard Panther(P-DOGG) on some basically state of the art pawn shop equipment complete with our own instruments we pulled from our closets and got some recording software to produce these ideas to CD form. With putting music and influences together after many years of friendship they completed a goal of starting their own underground record label with actual over sea sales thanks to garageband and cdbaby.com. The CD sales and our extra spending cash helped us upgrade CUTPHARMERS to another level adding new ventures of live music from A-STATIC on microphone and TITO on some drum and turntable action. These two added a whole new flavor to what we consider to be some of CUTPHARMERS best work yet. With new members and PRO equipment we are able to combine all these ideas into one piece of marvelous work. With many influences in different genres of music our horizons are expanded with many new projects when we have the time to work. We are working on booking many shows in the local area as we upgrade complete with t-shirts for the people that need new gear.. We would like to thank everyone who made these projects possible our family and friends and we can't forget the fans. Much gratitude to you all.
