

Physics Of Tsunamis

[DOWNLOAD HERE](#)

1;Preface;5 2;Contents;9 3;1 General Information on TsunamiWaves, Seaquakes and Other Catastrophic Phenomena in the Ocean;12 3.1;1.1 Tsunami: Definition of Concepts;13 3.2;1.2 Manifestations of TsunamiWaves on Coasts;16 3.3;1.3 Tsunami Magnitude and Intensity;21 3.4;1.4 TsunamiWarning Service: Principles and Methods;26 3.5;1.5 Databases and Tsunami Statistics;28 3.6;1.6 Seaquakes: General Ideas;31 3.7;1.7 Hydroacoustic Signals in the Case of Underwater Earthquakes;33 3.8;1.8 Killer Waves in the Ocean;35 3.9;References;38 4;2 Physical Processes at the Source of a Tsunami of Seismotectonic Origin;41 4.1;2.1 Seismotectonic Source of a Tsunami: The Main Parameters and Secondary Effects;42 4.2;2.2 General Solution of the Problem of Excitation of Gravitational Waves in a Layer of Incompressible Liquid by Deformations of the Basin Bottom;59 4.3;2.3 Plane Problems of Tsunami Excitation by Deformations of the Basin Bottom;66 4.4;2.4 Generation of TsunamiWaves and Peculiarities of the Motion of Ocean Bottom at the Source;92 4.5;References;104 5;3 Role of the Compressibility of Water and of Non- linear Effects in the Formation of TsunamiWaves;108 5.1;3.1 Excitation of TsunamiWaves with Account of the Compressibility of Water;109 5.2;3.2 Non-linear Mechanism of Tsunami Generation;141 5.3;References;159 6;4 The Physics of Tsunami Formation by Sources of Nonseismic Origin;162 6.1;4.1 Tsunami Generation by Landslides;163 6.2;4.2 Tsunami Excitation Related to Volcanic Eruptions;174 6.3;4.3 Meteotsunamis;180 6.4;4.4 Cosmogenic Tsunamis;192 6.5;References;202 7;5 Propagation of a Tsunami in the Ocean and Its Interaction with the Coast;205 7.1;5.1 Traditional Ideas Concerning the Problem of Tsunami Propagation;206 7.2;5.2 Numerical Models of Tsunami Propagation;221 7.3;5.3 Tsunami Run-up on the Coast;231 7.4;References;237 8;6 Methods of TsunamiWave Registration;241 8.1;6.1 Coastal and Deep-water Measurements of Sea Level;242 8.2;6.2 Geomorphological Consequences of Tsunami: Deposits of Paleotsunamis;249 8.3;6.3 Tsunami Detection in the Open Ocean by Satellite Altimetry;255 8.4;References;262 9;7 Seaquakes: Analysis of Phenomena and Modelling;264 9.1;7.1 Manifestations of Seaquakes: Descriptions byWitnesses and Instrumental Observations;266 9.2;7.2 Estimation of the Possibility of Stable Stratification Disruption in the Ocean Due to an Underwater Earthquake;290 9.3;7.3

Parametric Generation of SurfaceWaves in the Case of an Underwater Earthquake;300 9.4;7.4
Experimental Study ofWave Structures and of Stable Stratification Transformation in a Liquid in the Case
of Bottom Oscillations;304 9.5;References;312 10;Colour Plate Section;315 11;Index;331 EAN/ISBN :
9781402088568 Publisher(s): Springer Netherlands Format: ePub/PDF Author(s): Levin, Boris - Nosov,
Mikhail
