sounds to listen to in the horizontal position... 13 MP3 Songs ELECTRONIC: Ambient, ELECTRONIC: Experimental Details: I want to thank Thaddeus and Vostok of the Noisettes for showing me what's really up there in the sky. Their new record on Festival of Failure, "Oconee Meadows", beams everything that's "out there" down to us here on Earth. via their unique soundz [transmissions]. The casual listener who simply uses these recordings as background music is truly missing out. One must attentively tune in to these as they would any other record if they really desire to know more about "the little girl who lived down the lane" or what it's really like to be "floating in an iridium sea". I can honestly say i've experienced these things because I've listened to these recordings. I've been to the Oconee Meadows, folks, and let me tell you, the view from there is otherworldly. The sounds on this recording paint vast landscapes for all to enjoy. This is not a one-dimensional instrumental record. It is rather a transport to multiple dimensions. Honest. -chris, luna records
