A sumptuous selection is presented from artists all hailing from Pacific nations to create a rich aural repository lovingly compiled by DJ Romantech head of Data:bass, the Auckland, NZ based DJ/Producer collective. The underground electronic music scene is just soaked with undiscovered talent. We cant wait around for a record company to decide that deep, thoughtful music will sell, because were putting our souls into saying something with sound and we want people to hear it. I didnt want to put together another compilation unless it was special, that I had a CD of artists whos passion and integrity resonates in the soul and beauty of the music. And from the sheer depth and capacity of sites such as myspace, the Oceanic release feeds the best elements accessible together into a potent brew of soothing rhythms and melodic beats.
