The "dance" portrays the evolution and movement of life itself, never the same and always in motion. Enjoy and experience the healing interactive energies. The music is a collage of the many soundscapes that I recorded with the Tibetan Monks, the Lacandon Indians and Peruvian Environments. This music is wonderful to play during healing work or for those that would like to lie back and relax. Dr. Elliot Diamond has drummed with/for shamans and healers throughout the world. As an accomplished medical doctor and acupuncturist, he understands and speaks the rhythms of the Great Mother Earth/body and translates this into these healing soundscapes.
