ROCK: Modern Rock, POP: British Pop Details: NoMoreDolls have been one of the most important live bands, in the European indie band circuit, for the last couple of years. Now, with the release of their first studio album, 'A Cat in the Mouth of a Mouse' (produced in London), they're taking a big step forward and proving that they are a solid and mature rock band ready to storm the radio charts everywhere!

Considering that the band has one of the most charismatic European female voices, the task doesn't seem too difficult. While listening to your favorite radio station, you may bump into the angry rock melodies of 'Another Girl' or the radio friendly harmonies of 'Illusion' or the intimate vibe of 'Stars on the Floor'. Each song on the record has its own unique power, which makes NoMoreDolls one of the most interesting rock bands of 2003. Nomoredolls are currently planning to perform in the Usa.
