Hard rockin' beats being consumed by deifying guitars and punched along by bass in your face grooves. 9
MP3 Songs ELECTRONIC: Industrial, ROCK: Psychedelic Details: Just sounds arranged in order to
create what we call songs. Sometimes I like to use parts of other people's stuff because they say
something you were thinking that much better. (That's what makes the remix such a wonderful art form.)
Other times I like to just make a song that challenges me to break out of the every day POP mold, or
makes me happy, sad, scared, or what ever. There is no good, bad or other wise in music just sound,
feeling, movement, and emotion. History: This has been an on going project from the first time I heard
music. When I found the music machine called a "Sampler" I knew that this is how I needed to express
my thoughts about music. Group Members: Just one guy willing to work with any one or anything around
him to create feeling, motion, and emotion through sound.
