Related styles: NEW AGE: Ethnic Fusion, EASY LISTENING: Instrumental Pop Details: I am from a small town in India, where electricity is not a necessity, but considered as a luxury. Many people are born with silver spoon but I was less fortunate. It was my dream, passion, and ambition to compose music. Finances were the bottle neck between me and my dreams. Education was the only way to survive in life, and hence I had to forgo my musical dream. It took few years to rethink of my dream. Being financially stable today has resurrected my dream of composing music. While I laid my fingers on the piano keys my heart was overwhelmed as my dream was transforming into reality. I composed 11 tunes which convey various emotions of a couple and I titled the album as "Take My Soul". "Take My Soul" is a Romantic album which describes steadfast love of a couple in good and bad times. The only binding factor in the couple is LOVE and ROMANCE for each other although they come from different backgrounds. Each composition gels with the passing phase of emotions among the couple in the form of conflicts, priorities, apologies and forgiveness still the couple remains in harmony. I have pledged to donate a portion of my sales to The Breast Cancer Research Foundation for every CD sold in the market today and also in the future. Your Support in the form of Prayers and Encouragement is highly appreciated.
