Noninvasive Vascular Diagnosis comprehensively covers all aspects of noninvasive evaluation of the circulatory system in the extremities. The increasing popularity of noninvasive techniques is not reflected in the number of comprehensive works on the topic and it is clear from the success of the first edition that the demand for an updated volume is increasing. This large format book is the definitive text written by the expert editors and contributors. It is well supported by exceptional illustrative material, producing the definitive work in the field. The book is invaluable to all those who work in vascular laboratories as well as internists, cardiologists, vascular laboratory directors and staff, general surgeons involved in vascular surgery and the vascular surgery community in general.
