LUMINA Lumina is primarily a record label. However, today it is far more than a record label. Indeed, besides the conventional recording activity, Lumina's artistic motto is "to provide a visual and sensual experience to its audience through a simultaneous performance of music, video clips, projections and exhibitions". The adventure begins in 1997, when Tahoe, Lumina's founding member, decided to go for the independent route after two successful mini albums released on the famous French record label F-COM. Through his music, Tahoe pictures imaginary worlds, where "elegant futurism", utopia and mysteries all have their share of the scenario. Indeed, his music is conceived like a visual and imaginary poetry. Lumina is continuously growing with the arrival of artists, painters, photographs, DJs. They all share the same vision: to experiment, create and provide a total sensitive immersion.
