

Domain Alarm

[DOWNLOAD HERE](#)

Is Your Website Working Properly? Last year I had set-up more than 5 different advertising campaigns to start on a Friday. Money spent: \$1,200. I came home from my long weekend that Sunday night expecting my email account to be overflowing with payment confirmations. Instead, not a single one! Hold on! I had tested all my ads...they were steady earners! What went wrong??? As it turns out, our web server had crashed that Thursday evening. If only I had been notified of the server downtime, I could have immediately contacted my web hosting provider. I lost over a thousand dollars. Do not let this to happen to you! Get Domain Alarm and Be the First to Know when your Website Goes Down! Domain Alarm is always working for you. Domain Alarm instantly notifies you if and when your website goes down. Realize all of the following Domain Alarm benefits: * Continuously monitor your website... automatically! * Check your website at any interval of your choosing * Monitor unlimited websites * Receive downtime alerts via email, pager, ICQ or text messaging device * Automatically launch your website to highlight the problem * Check your website automatically or manually, on-demand... * Never worry about server uptime again!
