Earthy and ethereal tunes with strong roots in folk, blues, and soul. 10 MP3 Songs FOLK: Modern Folk, POP: Folky Pop Details: "I Think Its Finally Morning", Alice Bierhorsts ninth album of originals, is simply beautiful. Her first solo acoustic album, each song is thrown in stark relief by her heartfelt singing and carefully chosen lyrics. Like a great short story writer, Bierhorst plumbs the depths of the human spirit in three minutes or less. Alice Bierhorst is based in New York. She has amassed a huge catalog of songs since she began writing in 1993 in San Francisco. Her songwriting has ranged from multi-metered prog rock to harmonically dense orchestral pop to Appalachian-style folk, but she is always unmistakably herself. Performing as a solo artist, sidewoman, and member of the band Rockdove, Alice has released nearly an album a year in the last twelve years. She believes that her journey is just beginning and the best years are ahead for an artist who has quietly developed on the margins. Alice has been compared to Nick Drake, David Crosby, and the Velvet Underground as well as Brian Wilson, 60's girl groups and the Stax sound. Other influences include Kate Bush, Joni Mitchell, Booker T. The M.G.s, and Stevie Wonder.
