Details: "Transformation" is the second release from Fidelity Music, the follow up CD to the successful 2002 debut release, "Around The World". As the title indicates, this collection represents a subtle change in musical direction. We offer 13 original instrumental tracks that combine classical, jazz, rhythm and blues and world music influences. We have attempted to combine intricate melodies with rich harmonies and exciting rhythmic back beats. Each composition is an individual story, and together, we believe, they create a soundtrack for everyday life that can be universally enjoyed. We appreciate all of those who have experienced our previous release and hope that you will thoroughly enjoy this, our second effort.
Peace and Love, czwilliams
