Progressive Rock with a Great Guitar Grove 13 MP3 Songs ROCK: Progressive Rock, POP: Today's Top 40 Details: What measures a band's worth? Is music simply voyeuristic magazine rack baby-pictures: cute, but useless. Or, can it still be a rush of auditory shivers? Koan believes it can. Since 1998, Koan has been locked in rehearsal creating a force. Although they emerge to play driven shows of original work, Koan thrives on writing and recording their sound. Vocalist, Ross Crockett, is consumed with pursuing his passion. With a lyric, or a tone, or a simple glance, he aims for the individual masses. Jeff McLellan lives guitar. Devoted to the search of new simplicity, he tries to play what the song needs. Whether it is he who effects the song, or the song that affects him, it is unclear. He is a slave to never reaching the finished product. In the tonal basement lives Shawn Burke. Whether soothing or stinging the resonance of his bass defines the song's mood. A minimalist with maximum ability, he underplays for effect. Francis Mella drives the band. With his feet on the pedals, and his hands on the sticks, the song is given direction, pace, and pulse. Bands can still be unique, fresh, and meaningful. Music doesn't have to emerge from a board meeting. Koan is a chaotic blend of its four members' intellectual property. Plug yourself in.
