Related styles: COUNTRY: Alt-Country, FOLK: Political People who are interested in Reba McEntire Sugarland Rush Limbaugh should consider this download. Details: PLEASE go to see the VIDEO -- "Bail Me Out" at youtube.com/pamandterryoriginal Pam Childs Bail Me Out From The Heart First I want you to know that the song Bail Me Out is about the government bail out program and the fact that we could all use a little of that money.. Right? The songs on this CD are all written by me , Pam , and my husband, Terry. We are musicians from Memphis, Tennessee and we are known as Pam and Terry. Our duo has traveled from Memphis to Holland and everywhere in between. Terry and I LOVE what we do, especially playing weekly on the world famous Beale Street here in Memphis and writing our own songs. This CD is a huge part of our life.. The song I Met Elvis is a true story of the night that I met Elvis Presley. It was 8 days before he passed away, we were at the amusement park here in Memphis just hanging out. It was his last outing before passing. The stories that you will hear in every song are really from our hearts. We write about real things, real emotions that most people have and real problems that we all face from time to time in our lives. Both Terry and I sincerely hope that you enjoy our songs and look us up from time to time to see if theres more to hear. As the years go by Terry and I have learned that life is a song. Songs help people get through the day to day/ ups and downs/and emotions that we all have. Please give this one a listen. We truly hope you like what you hear. Love in Music, Pam and Terry
