

Mp3 Pregnantwaterrock - Orphan Symphony... L.e.

[DOWNLOAD HERE](#)

In synced - These are the abandoned sounds that take form and distribute raw purity. 17 MP3 Songs HIP HOP/RAP: Trip Hop, ELECTRONIC: Drum 'n Bass/Jungle Details: "Orphan Symphony" is the debut instrumental album, in double disc form, from PregnantWaterRock. With his debut, PregnantWaterRock hopes to take you thru a journey where samples (described as Orphans) meet and fuse to become linked kids and distributing the sound of freedom. The LP is a story of music that have been left behind, abandoned by producers who have lost there creativity and approach to what once created them. This is a cry by the cause of a lost link between human and sound. I mean... what can I say. How can I describe the abuse that the alignment has taken? Everyday I witness these orphans roam repeatedly to corners trying to find placement but no one was willing to take them in. The concept of experimentation was depleting along with the effort that gave the knowledge balance. This album is fully conducted by PregnantWaterRock himself and a few guest appearances such as: k-the-i???, Strategist, KaeoFLUX. The bonus disc also features like Str8-A, .5, Rah-Vital of NBS and etc, as well as fully produced by PregnantWaterRock. For the listener - Be prepared to expand your understanding of music and focus to see what could be rather than what's out there now. This is an offspring form of HipHop/electronic/ambient/triphop/jungle/salsa, and etc. Support the children. ****SPECIAL NOTE**** This is a double disc LP which is the reason for the Limited Edition stature. The bonus disc is a collective of 5 tracks from a lost project under the old alias of Retarded Sapp. The Official release of the LP will be in late July '04, and it'll only be a single CD. Also to mention with this L.E. offer, when purchased, if you find a sticker inside then you will get the Bobwire Stensols EP for free. The hunger, that persists to see creativity take back its form... lives on. Breathe well citizens.
