to make music, armed with analogue electronics and bits of wood, their songs swerving from idiotic

electropunk to the most delicate of ambient snuggles. They ran away to live in Brighton by the sea, in a

"Subjected the West End of Glasgow to a torrent of acoustic abuse that could only be likened to the

sound of a theremin being brutally raped by a Vandergraaf machine"Michael Harrison, professional sound

engineer "Exciting, like the thrill of gambling"Ronan Yakuza, rock star "Polemic, provocative, and ironic.

They like to cause a stir, to make a scene"Strikesparks fanzine of Befarce "Bulbous analogue synth

workout with hints at very early Human League, Cabaret Voltaire and The Normal, topped by a strident,

semi-gothic female vocal"Nightshift fanzine of Oxford "An emotive, soulful depth, a distinctive grain of the

voicegenuinely touching"Jenniferlovewabsnazm "Completely entertaining. Very little to do with lame 80s

synth duos (or Ladytron for that matter) and a lot more in common with punk, the first four Eno albums
