The new CD, Magnetic, has just been released and the band is beyond excited for your ears to hear it. Anthrophobia still exists for a few basic primal reasons: the band are at the top of their game, kicking ass live, have just released their best set of music to date; and most importantly, still enjoy playing and creating music together. After 14 months of writing, demoing, recording, rerecording, mixing and mastering, Anthrophobia have finally released a CD that they feel accurately represents them as a rock entity. Magnetic incorporates inspirations and elements from all of the previous 'Phobia catalog, taking experiments and risks within the band's creative walls, as well as pushing them to new limits. The band are never reap in their satisfaction and self gradifacations for long. 2005 shows the band writing and performing new songs again. The band will enter the studio in winter 2005 for a '06 release. As always, Thanks for listening.
