African Chrsitian Worship Music from Nigeria. Very inspiring even if you don't understand the lanaguage. A must have for your quiet time. 8 MP3 Songs GOSPEL: Traditional Gospel, WORLD: African Details: Music and Worship go hand in hand. It is my hope that every time I write, arrange or present music to people in any form, recorded or live, that the music inspires, motivates and leaves an impression that something or someone greater than them exists... I've explored this belief of experiential music in 2 recordings within this series called "Eledumare" which basically means GOD. The series currently consists of Vol. 2 and Vol. 3 and they are both available on CDBaby. Vol. 4 is in the making and it will be a live studio album (compared to vol. 2 which was a constructed studio album). Vol. 4 promises to be a deeper exploration of the relationship between music and worship which will then fuel vol. 5 which I hope to be a stage performance with strong multi-media elements to be released as a DVD/CD Combo.
