

Mp3 Lee Selwood - Imagine This

[DOWNLOAD HERE](#)

Rock instrumental with a touch of class and very nice melodic structure that has direction leading into the left of main stream of soft rock to rock. 9 MP3 Songs ROCK: Instrumental Rock, NEW AGE: New Age

Details: In 1999, I releaseed a second Independent instrumental CD titled "Imagine This", which was a collection of seven new original songs and included the re-recordings of two songs from the previous released CD. This CD has direction toward the Soft Rock to Rock style and carefully planned in the of writing and recording which can be heard when listening to this project. With this release, I granted Paul Royter, a Hypnotic Comedian, license to use music clips from "Imagine This" in his world traveling comedy show, and shortly after, I wrote and recorded the theme music for his introduction to the show. This was a 2-year contract, which ended in the year 2003. Since the year 2003, I have become a member of SOCAN, and worked with several aspiring local musicians to record demo projects. I am involved with a local group called "One Odd Sock" which is a cover band of top 40's, includes Rush, and many other groups. In the band, I am refered to as the "Musical Director". The 3rd release is on it's way with greater creative writing, power and ripping guitar riffs and solos.
