The 21st century qualifies as one in which humanity raised environmental decay, especially climate change, as a key global concern requiring urgent political attention. The book Framework and Tools for Environmental Management in Africa is written from this perspective. It provides researchers from different disciplines including environmental sciences, engineering, commerce, planning, education, agriculture and law, as well as NGOs, government officials, policy makers and researchers, with a platform to engage with concerns relating to sustainable environmental management in this epoch. Topics covered include global landmarks for environmental governance, environmental management on African agenda, sustainability reporting, environmental impact assessment and public participation as well as environmental education. These remain viable in the African set-up where major development projects in mining and agriculture require greater scrutiny. With a collection of both revision and critical reflection questions, carefully constructed by authors with significant experiences from institutions of higher learning across Africa, readers will find this publication a valuable addition to their shelves.
