

Mp3 Dj Messenjah And Friends - Electronic: House

[DOWNLOAD HERE](#)

Funk, Jazz, Soul, and Hip Hop Influenced Dance Music. 12 MP3 Songs ELECTRONIC: House, ELECTRONIC: Dance Details: Hey whats up everybody? My name is Kevin Thompson and I am from Lexington, Kentucky. I have been DJing for a little over 4 years and producing for about a year and a half. One of my friends got me into dance music and took me to my first rave in high school. After going to parties for a couples years I fell in love with the music and got into mixing records. I started out mixing happy hardcore at first because I loved the energy and the vibe it brought to a party. Soon after I started mixing I got a job at 808 Records and my record collection grew as well as my tastes. Today I am more into funky, jazzy, soulful, disco house. I still have a crate of happy hardcore and trance records though. I have always loved music and started playing guitar on and off since 7th grade. Now I am trying to progress to bass and piano as well. I am also trying to learn how to produce and record tracks. It has been a great learning experience over the past couple of years since I began to set my studio up. It is a dream come true to be able to put my first cd out. I have been blessed with a variety of talent and beautiful people to make everything possible.
