Subtle but powerful folk/rocktronica 8 MP3 Songs FOLK: Angry, ROCK: Folk Rock Details: TO CLEAR UP ANY CONFUSION: This is NOT a rock record!!! Before H is Orange was a full blown rock band, H is Orange was a simple concept and creative outlet stemming from the imagination of lead vocalist Sam Nelson. Over a period of one year (early 2000), a number of songs were written, recorded and copied onto numerous mix tapes and Cd's. After several months and a lot of positive feedback, it was finally decided to compile all the tracks to make one definitive disc. That disc is "Telepathetic." DESCRIPTION: H is orange solo project blends sample based rhythms and melodic textures with organic instrumentation and poignant lyrics to create a highly unique and versatile sound. Similar artists may include: Beck, Radiohead, Coldplay, Abandoned Pools, Bright Eyes, Lewis...but then again it's not like any of them at all. These are a collection of very personal songs that serve as a starting point for the evolution of a musical endeavour. I hope you enjoy the process. Thanks for listening and for all your support Much Respect -Sam
