experimenatal post modern electronica 9 MP3 Songs ELECTRONIC: Techno, ELECTRONIC:

Experimental Details: Music of "Spiral Lounge" was inspired by the universe of its reputitiousness and the harmony. On top of its "dance/club" like groove, "Spiral Lounge" had accomplished to layer the classical music phrases without killing its harmonies and dynamics. Synthesizer and the drum samples were used a lot of times to create "club music" like atomosphere. However, you can still feel "organic side" in the music(cd). When those songs are played live, they will be played as band style. The concept of playing shows tend to come from improvisation(communication and inspiration) because of Massa's music background. Sometimes, they could be played totally different from its original version and some flavor will be added to make the live performance(presence) interesting. Massa Takemoto has started new project called "cosmic love experience" check out counteractiverecordsfor more information and up dates! and one more thing! ... please write reviews!!
