Country and Western 114 MP3 Songs COUNTRY: Traditional Country Details: Frank was rather upset when listed as an experimental rock musician though he has played in this genre. This prompted him to put together a 6 CD (7 hour long, 114 track) collection of his country and western music dating from 1990 to 2005. You wont find any pop production or blaring rock guitar lines but songs from the rural areas of the Southern states of America. There are songs about Viet Nam, Iraq,cheating, trains,small farmers being robbed by bankers, Jesus, love, heartache, family and many other traditional country lyric themes.Mr. Stola wants to clear the record and show where his heart is musically and that is country and western music. There may have been a murder on music row but they sure as heck didnt kill Frank J. Stola eagerly awaits returning to a Nashville studio to record some more music.
