My music is often described as music that would sound perfect for video games and films. After hearing this so many times, I started composing short and moderately long melodies with a goal of scoring for video games in mind. I have been told that most of 30 MP3 Songs in this album (45:11) ! Related styles: CLASSICAL: Baroque, CLASSICAL: Contemporary People who are interested in Johann Sebastian Bach should consider this download. Details: Hello everyone! My name is Robert Mancino. I have been composing music of many genres for a while now here in southern California. I just finished an album, which is a collection of classical/video game style melodies I have been working on over the past couple of years. I'm also working on an acoustic rock album with vocals, which will be very different from this first album, which is strictly instrumental. I discovered CDbaby completely by mistake and right away I knew this was the way to go for me (being an unsigned artist with no current connections). What also drew me to this site is that I really like how this company actually cares about the music and artists and isn't just about the money like most companies.
