The Dons have the ability to weave and mend gorgeous, infectious and sweet lilting pop melodies over silky-smooth guitars 12 MP3 Songs POP: Power Pop, POP: Beatles-pop Details: From Los Angeles, The Dons grabbed our attention at IPO 2001, when upon putting a CD of demos into our rental car, we were promptly blown away by the bands' ability to weave and mend gorgeous, infectious and sweet lilting pop melodies over silky-smooth guitars. Echoes of lots of Velvet Crush, early Posies and "Girlfriend"-era Matthew Sweet abound abundantly. The band's leader, Don Mogill, combines a (Paul) Chastain-esque upper register vocal with his ultra-melodic guitar style, while guitarist Ken West(Receiver) adds some of Teenage Fanclub inspirations inside all of the soulful splendor. "Rarely does a debut album from a relatively unknown pop sound as exciting, fresh and consistently melodic from start to finish as DOWN OF THE DONS. It rocks, rolls, shakes and pops with mucho elan, and also happens to be bursting at the seams with great songs. Bugy three and make all the other kids on the block jealous"-Amplifier. The entire band is compelling in its energy for this material that is hard to not love with all its magnificent sing-a-long choruses and pure pop sheen. The Dons have. confidently arrived!
