MP3 Songs ELECTRONIC: Soundscapes, NEW AGE: Meditation Details: Though he was born in Los Angeles, California, Yon spent most of his musical career in Detroit. He attended the University of Michigan for engineering, but pursued music shortly thereafter. It all started with the contemporary jazz group, "Magic", which did well throughout Detroit. However, it was a decade later when his direction in music was strongly influenced by the "Hearts Of Space", a popular new age radio program. Inspired by artists such as Steve Roach, John Serrie, Tim Story, Paul Haslinger, Kitaro, and Mars Lasars, Yon has managed to incorporate his own style into a relaxing blend of simple melodies and electronic soundscapes.
