

Mathematical Modeling Of Biosensors

[DOWNLOAD HERE](#)

Introduction.- Part I Analytical Modeling of Biosensors.- 1 Biosensor Action.- 2 Modeling Biosensors at Steady State and Internal Diffusion Limitations.- 3 Modeling Biosensors at Steady State and External Diffusion Limitations.- 4 Modeling Biosensors Utilizing Microbial cells.- 5 Modeling Nonstationary State of Biosensors.- Part II Numerical Modeling of Biosensors.- 6 Mono-Layer Mono-Enzyme Models of Biosensors.- 7 One-Layer Multi-Enzyme Models of Biosensors.- 8 Multi-Layer Models of Biosensors.- 9 Modeling Biosensors of Complex Geometry.- Part III Numerical Methods for Reaction-Diffusion Equations.- 10 The Difference Schemes for the Diffusion Equation.- 11 The Difference Schemes for the Reaction-Diffusion Equations.- References.- Index. EAN/ISBN : 9789048132430 Publisher(s): Springer Netherlands, Springer, Berlin Discussed keywords: Biosensoren Format: ePub/PDF Author(s): Baronas, Romas - Feliksas, Ivanauskas - Kulys, Juozas
