Dreamy electro-acoustic Chill Out blending elements of rock, folk, and jazz. Featuring female vocals ranging from the sensual to the sublime, plus moody acoustic and electric guitars, touches of sexy saxophone and soulful Rhodes piano. 10 MP3 Songs ELECTRONIC: Pop Crossover, POP: with Electronic Production Details: This California duo's lush, sensual songwriting embraces numerous genres creating a unique blend of slow-burning Blues, Bebop Jazz, Flamenco-spiced Folk Rock and Western-tinged Dream Pop on this first full length album. "Windblown Kiss" focuses on beautiful melodies based around former Love Spirals Downwards bandleader Ryan Lum's dreamy acoustic and electric guitar playing combined with jazzy chanteuse Anji Bee's lovely and versatile vocal work. The album also features special guests Sean Bowley (of Projekt Records' Eden) on guitar vocals, and Doron Orenstein (of Subliminal Records' Monkey Bars) on saxophone. Romantic, spiritual, and utterly heartfelt, "Windblown Kiss" envelopes one in a soothing dream-drenched world, full of nostalgia and beauty. Embraced by their Projekt Records fanbase as "Gothic Jazz" in the vein of Angelo Badalamenti Julee Cruise's work for David Lynch's "Twin Peaks" series -- or to dark Trip Hopsters, Portishead -- yet hailed as sweet "Twee Pop" akin to Jewel or The Cardigans by the English press, while still compared to Sade and Astrud Gilberto by the Jazz community - the only sure description of Lovespirals' "Windblown Kiss" is that there are no easy comparisons to make. There's simply no pigeonhole to place this CD into! Just when listeners think they know what's coming next, Lovespirals throws another curveball, from the Pink Floyd-esque guitar and saxophone blues of the opening track, "Oh So Long," to the Lum classic, Spanish-languged "Dejame," to the island infused, Santana-esque, chill tune, "Our Nights", and on to album closer, classic 50's jazz styled lounge, "I Can't See You," -- not to mention two gritty Western-tinged duets with Tim Buckley-esque guest star, Sean Bowley -- "Windblown Kiss" truly mixes

and matches the bands musical influences into an unexpectedly heady concoction. Different to be sure from Lovespirals' fare past, such as the their atmospheric drum 'n' bass EP, "Ecstatic," and different from Lovespirals fare to follow, this release strips down the electronic elements and builds up their song structures using organic sounds harkening back to earlier Love Spirals Downwards material, but with that smooth, sensual Lovespirals touch. PLEASE NOTE: the price is set very low because these are cut-out CDs with a small nick in the spine of the plastic case. The CD itself is perfect and all of the packaging is in tact. If you would prefer to buy a non cut-out copy, please visit projekt.com.
