

# Mp3 The Grand Papa Donks - Studio Jams Volume 1

[DOWNLOAD HERE](#)

Jazzy funky rockish style that is upbeat and generally humorous. 14 MP3 Songs JAZZ: Free Jazz, NEW AGE: Ambient Details: This is the second CD in a set of two that were produced from the archives of the Anacrusis Sound Studio. The first is our CD called "Songs Stuff" and it contains several finished songs along with some jams produced in the studio over the past three years. Some strange circumstances brought the production of music out of the studio to a grinding halt for a time, not the least of which was a bout that I had for a year and a half with leukemia. Well, I survived! But this version of the band did not...so I decided to take what we have and put it out to the music loving public and am moving on from here. This CD features a collection of lightly edited jams in their raw form. There was no post production on any of them so they are all in their "as performed" state. Although they are not "perfect". They are very real and have an energy that cannot be captured any other way than in a live performance. Some of them are really funny, all of them are really good (in my humble opinion), and none of them would be available if it were not for the folks at CD Baby and their wonderful service for independent artists.
