

# Brainwave Therapy - Super Learning

[DOWNLOAD HERE](#)

When you need to study, cram, or sharpen your concentration for peak mental performance, Super Learning is the sound solution. Precision-engineered frequencies are harmonically layered in soothing music. They guide your brain activity into a hyper-receptive state, where trigger phrases and key words are received by the subconscious. As both hemispheres of the brain move into perfect balance, frustrating mental blocks dissolve. You enter a flow state of relaxed awareness where new information is easily absorbed and stored in long-term memory. This Brain Wave Subliminal activates the unlimited power of your learning abilities. Theta frequencies induce states of hyper-receptivity to subliminal messages. Here, a new set of self-empowering beliefs are firmly imprinted in the unconscious. You'll notice a remarkable change in attitude that dramatically improves your ability to learn, recall, and access new ideas. This recording contains the following subliminal messages: Learning is easy, I am very smart I remember effortlessly My mental potential is unlimited I can integrate massive amounts of information I am brilliant, I enjoy learning I am learning all the time I absorb information effortlessly I am confident of my abilities I feel intelligent, I am intelligent My mind works perfectly I get all the help I need I concentrate easily, I stay focused I have an excellent memory I am clear and lucid My mind is organized I am expanding my horizons with new knowledge I am relaxed, alert, and aware I am focused, centered, and clear I activate my mental potential My life is enriched with knowledge This Brain Wave Subliminal has two tracks; both contain the exact same subliminal messages. You can listen two ways. Listen to both tracks anywhere or anytime over your stereo system. While you won't consciously hear the subliminal messages, they will be received and absorbed by your subconscious. For deeper subconscious programming, and to receive the full benefits of Brain Wave Therapy, listen to track 2 (the one without the piano overlay) with headphones at a time and place when you will not be disturbed. Allow yourself to simply drift and relax. You might even fall asleep and take a refreshing nap. Whether you fall asleep while listening or not, theta brain wave frequencies will induce heightened receptivity to the messages. Theta brain waves have been identified as essential to learning and storing information in long-term memory. Theta is the ideal state for subconscious reprogramming.
