

Mp3 Kuderski - Polarity

[DOWNLOAD HERE](#)

Film-styled music for the senses. 20 MP3 Songs in this album (56:24) ! Related styles: CLASSICAL: Film Music, CLASSICAL: Modernist People who are interested in BT Philip Glass Clint Mansell should consider this download. Details: Music is the heart of my soul. Without music in the world there would be no motivation to move forward and evolve emotions. I see myself as a unique musician. I compose and produce anything from classical/film score music to electronic/DJ music. Music, like most things in life, is a continuing journey. I'm open to creating scores for TV commercials, independent films, short videos, and mainstream projects. My latest music projects was a holiday greetings TV spot for Milwaukee Public Television and I was the music arranger for a Milwaukee Braves Documentary for MPTV. When I was little I started tinkering around on the piano. As of right now I've been professionally instructed in theory, composition, harmony, ear training, performance, music reading, and improvisation. I like to combine elements and create something that will carry on for generations to come. Most of my creations are done with a computer and an 88-key midi controller. I'm versatile in computer music programming/sequencing. On aside I created some one time TV shows, and about four years ago I decided to become a local DJ for clubs. Right now I've finished a song for Discovery World in Milwaukee and it is included in my first album. My first album is called "Polarity". It is based on techniques used for film scores as well as for videogames.
