Driving 80's rock'n'roll guitar metal with a pinch of Melodic Rock stirred in. 11 MP3 Songs ROCK: 80's Rock, METAL: 80's Metal Details: Let's see... a long time ago big hair, spandex and "guitar rock" was what was happening in the music scene. MTV just played rock videos and we all stayed up late or made it back from a gig in time to catch the Head Banger's Ball. Yes, this was the mid to late 80's. Bands like Dokken, Ratt, Tesla, Warrant, Ozzy (still hanging in there today!), Whitesnake and way too many others to list were what we were listening to. So how did five guys get together to make one of the tightest, loudest, most popular bands of the area? I guess it will best be told by each member in his own words. So as soon as I can get them to write it down, it will be here. From Turk the flamboyant front man that liked to strut like Mick Jagger to Mike with more bandanas on him than people at a Willie Nelson concert to Tony kicking his legs in the air with the biggest frizzed hair to Bruce's snake skin pants that he always seemed to wear for every gig to Stacy's glam meets Rocky Horror with cowboy boots outfits...whew! Those were the days.
