Easy listening melodies. 16 MP3 Songs EASY LISTENING: Background Music, JAZZ: Jazz Fusion

Details: There are only three things in music I am eager for: 1) melody, 2) melody and 3) melody. It's a joke. Of course, we need some "mediums" (rhythm, chords, arrangement etc.), but all these things can not make any miracle of music. Only melody can. There is no explanation why certain notes in a certain sequence make a melody, and very similar notes in a slightly different sequence do not. It is a secret. I am excited (and in some sense happy) every time when I am listening a melody (unfortunately these are quite rare moments). And contrary - I feel myself quite bad when a non-melody is wrapped up as a music. Everybody can ask me: "Does your music have this quality of "melody"?" And my answer is: "I do not know."
