"amazing voice, pop with a jazzy edge" 11 MP3 Songs POP: Piano, JAZZ: Traditional Jazz Combo  
Details: Life for an artist is hard enough. But what happens when you actually get what you want. For Vanessa Renee this is a big question. In her new release, Stay, Vanessa addresses the question of the elation, security, emotion and pure indescribable happiness of the time when you are in love. A time when you are lost in the thoughts of the moment and the other person, when nothing else seems to matter. For example in featured songs such as This Life, Vanessa talks about the little things in life like the safe and secure feelings the other person gives you that nothing in the world can affect you when you are in love. That you can have all that you hope and dream for. However, as we go through the journey of life we don't realize we have a good thing until it keeps showing back up. This is the message of the song, Fall. A song, which reminds us that sometimes coming back to the same person, is a good thing. You can look all over and hope to find it in others but it's already in one person you can easily find. While the title song, Stay, simply states that at some point in time, you just get tired of playing the looking for love games and let your guard down and let the evitable happen. While most artists dwell on the bad end of relationships or ricochet from one to another, Vanessa Renee reminds you of a valuable lesson. When you finally find the love you have been so desperately looking for, enjoy and appreciate all that it brings. "With soaring vocals and melodic keyboard, Vanessa Renee blew away the crowd at Little River Band's show here, and since has become a popular staple" John Eagan- The Handlebar
