Designed for professional photographers who are already well versed in the basics of lighting, this book will take their lighting to the next level, adding the flair and refinement that can turn professional images into world-class photos. Each chapter explores a different master photographer, with a thorough analysis of signature techniques, a look at the creation of his or her top images, and a discussion of past photographs that presented lighting challenges. A virtual master class, this book presents the teachings of nearly two dozen photographers for a fraction of the price of a single photography seminar.
