

The Future Of Life And The Future Of Our Civilization

[DOWNLOAD HERE](#)

This unique book is the proceedings of 'The Future of Life and the Future of our Civilization' symposium, which was held in May of 2005 in Germany. It is unique since it contains articles of the Future in all aspects of our life. Besides, until now such publications are absent. In this book we can find articles about the spread of life trough out the cosmos and about solar evolution, about origin of life and about cardiology in XXIst century, about structural regularities of encoding in DNA chromosomes, about preservation of biodiversity in marine systems and about defeat of aging, about life-time of technological civilization and about the future of the poor, marginalized populations, about the early cancer diagnositscs of skin, about human clonius and about transition to the next level civilization. EAN/ISBN : 9781402049682 Publisher(s): Springer Netherlands Format: ePub/PDF
