

Continuous-time Signals

[DOWNLOAD HERE](#)

Preface.- 1. Introduction. 1.1 Signals Application in Systems. 1.2 Signals Classification. 1.3 Basic Signals. 1.4 Methods of Signals Presentation and Description. 1.5 Signals Transformation in Orthogonal Bases. 1.6 Summary. 1.7 Problems.- 2. Spectral Presentation of Signals. 2.1 Introduction. 2.2 Presentation of Periodic Signals by Fourier Series. 2.3 Presentation of Signals by Fourier Transform. 2.4 Spectral Densities of Simple Single Pulses. 2.5 Spectral Densities of Complex Single Pulses. 2.6 Spectrums of Periodic Pulses. 2.7 Spectral Densities of Pulse-Bursts. 2.8 Spectrums of Periodic Pulse-Bursts. 2.9 Signal Widths. 2.10 Summary. 2.11 Problems.- 3. Signal Modulation. 3.1 Introduction. 3.2 Types of Modulation. 3.3 Amplitude modulation. 3.4 Amplitude Modulation by Impulse Signals. 3.5 Amplitude Modulation by Periodic Pulses. 3.6 Types of Analog AM. 3.7 Types of Impulse AM. 3.8 Frequency Modulation. 3.9 Linear Frequency Modulation. 3.10 Frequency Shift Keying. 3.11 Phase Modulation. 3.12 Phase Shift Keying. 3.13 Summary. 3.14 Problems.- 4. Signals Energy and Correlation. 4.1 Introduction. 4.2 Signal Power and Energy. 4.3 Signal Autocorrelation. 4.4 Energy and Power Spectral Densities. 4.5 Single Pulse with LFM. 4.6 Complex Phase-Coded Signals. 4.7 Signal Cross-Correlation. 4.8 Width of the Autocorrelation Function. 4.9 Summary. 4.10 Problems.- 5. Bandlimited Signals. 5.1 Introduction. 5.2 Signals with Bandlimited Spectrum. 5.3 Hilbert Transform. 5.4 Analytic Signal. 5.5 Interpolation. 5.6 Sampling. 5.7 Summary. 5.8 Problems.- A. Tables of Fourier series and transform properties. B. Tables of Fourier series and transform of basic signals. C. Tables of Hilbert transform and properties. D. Mathematical formulas. References. Index. EAN/ISBN : 9781402048180 Publisher(s): Springer Netherlands Format: ePub/PDF Author(s): Shmaliy, Yuriy
