Music that moves. Strong electronica with lots of good sampled acoustic instruments mixed with software synthesizers. Dance, Ambient and Electronic. 12 MP3 Songs ELECTRONIC: Ambient, ELECTRONIC: Dance Details: Started of making music purely as a hobby. I bought a cheap keyboard and tried to play it. At the time pc's were not not good enough and I did not know how to use a pc to make music. So a friend at work introduced me to the world of pc's and music. He played in a band and had his own studio. He had gear galore and I immediately got hooked on making music. Initially I used only hardware synthesizers.(Dr. Synth,Roland JV880). Both these were stolen so I started playing around with soft synths. All the songs I create now is done with samplers, softsynths, midi keyboards and PC. I like to mix acoustic instruments with synths. I hope you enjoy the music as much as I enjoyed creating it.
