

# Mp3 Bill Schaeffer - Music For Nightmares

[DOWNLOAD HERE](#)

Subconscious Outer Space music. Ambient sound collages and synthesizer jams with an unsettling undertone . Designed to raise the hairs on the neck of your unconscious mind. 16 MP3 Songs NEW AGE: Space, ELECTRONIC: Ambient Details: This CD and "Music for MuTanTs" were 15 years in the making. Most songs were composed between 1992 and 1996. A few, like "Goblin Dance," "Galactic Cathedral" and "The Origin of Life" were written this year. "Reunion" was originally written in 3 days during a Holiday visit by my Brothers, Mother, and Nephew in Hermosa Beach. Some songs were influenced by the Laser Light Recordings from Voyager called "Symphonies of the Planets vol 1-5." I highly recommend the series. Solo Piano versions of "A Long, Long Time" and "When Will I See You Again ?" can be found on the CD's "Grain of Sand" and "Piano Sole" respectively -- available from amazon.com. All the arrangements were polished a little for this release, but many have withstood the years quite nicely. I hope you enjoy this CD as much as I enjoyed creating it. I suggest listening to it late at night when the lights are low and the doors are locked. Just relax and close your eyes...
