

## Sgs Homeguard

[DOWNLOAD HERE](#)

SGS HomeGuard is the professional multi-purpose video motion detection software used to capture and store snapshots from webcam of your PC. It was designed for individuals, small and mid-sized businesses uses including video monitoring of their offices, buildings or logging of in-store cameras. SGS HomeGuard has a broad range of possible applications. You may connect a webcam to your PC and have it react to many kinds of motion. This means that today motion detection has become more easy and affordable for you.
