

# Mp3 Dehumo Bickersteth - What A Life...longing, Searching, Hoping

[DOWNLOAD HERE](#)

Deep melancholic ethnic flavoured instrumentals with some jazz and newage influences. 10 MP3 Songs

WORLD: African, JAZZ: World Fusion Details: For those who have listened to my previous works on other albums, this is a little different from what you would expect. For those who have never listened to any of my other productions, this is a good fresh start. In "What a life..." I have chosen to use music as my main vehicle of communication, not songs or lyrics. Without changing much, I have held on to the musical ideas as they came to me. The context of interpretation is the title of the piece and the writing on the sleeve... Over the years, I have listened to these tracks and tossed them here and there trying to force them to fit into a mould they were obviously not designed for. Like life, we sometimes find ourselves trying hard to become something we would never be able to become. Consequently, we fail to become the one thing we are able to become, or more accurately, fail to realize and appreciate the one thing we already are. Music comes to me as moods. I sit down with an instrument, a keyboard or piano because I am in a particular mood. I play and I decide which chord progressions, melodies or sounds I play are acceptable and which ones are not. These decisions, I believe, are based mainly on the mood I am in . Therefore, the composition I end up with, I believe, is my musical interpretation of that mood. "What a life..." is an initial portion of my perspective of the story of life that I have chosen to tell. And I will continue to tell it until life ends either just for me, or for the whole human race. As much as lyrics, titles and associated visuals might impose a context upon these musical expressions, they merely represent one perspective of the experience, and you are free to find your own perspective from which you will derive your own meaning and value to these expressions and experiences.
