

Mp3 Francesco D'angelo - Cafe' Do Brasil Vol.IV Percucion

[DOWNLOAD HERE](#)

A stunning percussion-based album from an expert percussionist, focusing on Afro-Brazilian styles. 14 MP3 Songs

WORLD: Samba, LATIN: Brazilian Jazz Details: Francesco today is an expert percussionist, since he has been studying for years, and he plays many Afro-Brazilian instruments. He traveled a lot both to Africa and to Brazil, where he met many local musicians. In Italy, he attended a training course from one master from Nigeria, where he learnt to play Djembe, a typical African instrument. Today though he is an expert musician, he keeps studying because he always wants to improve himself. When he was 5 he started playing, but since he had no instruments, he used to play saucepans as drum. Today he owns a record company which he founded himself, the MAGICWORLDSTUDIOS: it is situated in Italy, North of Rome, and he intends to open a new branch of it in Brazil, because the artist wishes to start a collaboration with some local musicians. THANKS to the Internet he is now famous and his songs have been downloaded by thousands of users; in this CD he included the most downloaded music from NAPSTER and ITUNES. His music cannot be classified into any musical genre, because Francesco likes inventing and proposing something new to his fans. Anyway, he gets inspiration from Afro-Brazilian traditional songs. Francesco is always willing to collaborate with people having interesting proposals and to answer questions, because one of his aims is to help emerging artists willing to go in the same career with a few means and few money. Francesco wishes to thank all his Fans, whose number is growing and who represent the spur to him for keeping going on that road.
