Guitar, Beatbox, and Voice - Mike B plays funky soulful music with touches of Brazil and electronica, all solo and organic with a DVD to prove it; "overwhelming skill almost too incredible to believe" says scissorkick.com. 10 MP3 Songs URBAN/R&B: Soul, ROCK: Experimental Rock Details: Mike B Invisible Man Guitar, Beatbox and Voice. "Over the last few years, I have been exploring a technique where I play guitar, beatbox and sing simultaneously, writing music that emphasizes every element to my fullest ability. The songs on this record are not elaborate studio productions. I wanted to record a project that captured the music of my live performances with studio-quality sound. Most everything you hear is exactly as I play it in the club. Where you hear humming, I hum and beatbox at the same time. Generally when you hear lyrics or multiple layers, that's a pedal capturing my beats and/or vocals in real time - live samples. Occasionally the voice gets effects that drop it down to the bass register ('Hey, Wait'; 'That Feeling') There is a DVD accompanying the 'Invisible Man' CD which includes live performance footage, to show you it's the real deal. "But more important than technique, I am trying to create music that spans a range of emotion and is, first and foremost, honest to my experience. I want to draw from so many musical influences that the whole concept of genre gets blurred; to create a space where we stop focusing on the things that make us different and come together over music. I hope that it moves you in some way. Love and peace." "Overwhelming skill, almost too incredible to believe," says scissorkick.com Mike B, 29, currently lives in Brooklyn, NY. This is his first full-length recording. More information, audio and video samples can be seen at the official website, mikebmusic.com.
